

# Petrofac Engineering and Construction Karachaganak Field Phase III Development

## ***KHI Role:***

To provide engineering support to Petrofac during the FEED phase of the project.

## ***Scope of Work:***

- Produce layout drawings and mechanical, electrical, piping, civil and structural bills of quantity sufficient to allow Petrofac to compile +/- 25% cost estimate. This was for thirteen remote manifold stations and pumping stations based in Bolshoi - Chagan and Kalmykovo.
- All work was carried out in KHI Thornaby offices with progress meetings held on a fortnightly basis.
